Equipment Finance

## Libor Košíček

Sales Director

“Contractors must have top-quality technical facilities. When the building season is in full swing and the weather is pleasant, they need to make the best possible use of these good conditions. With this in mind, we respect the seasonal nature of the work and reflect this in individually configured repayment schedules. While leasing remains popular, we also provide credit and insurance.”

The demands placed on contractors are intensifying year after year. These days, construction is not limited to several months a year, but is virtually non-stop, regardless of the weather. Construction technologies, machinery and other equipment are rapidly adapting to this trend. We will help you to finance the very best, completely reliable construction and road machines.

We are a leader on the non-bank financing market for construction machinery assets. In 20 years, our portfolio has encompassed almost 3,500 different building technologies. We finance a comprehensive range of construction and road machinery for surface works and civil engineering – excavators, diggers, loaders, bulldozers, haul trucks and other specialised machinery.

## 5 reasons to rely on us

1. We work with all the major manufacturers and vendors whose portfolios include the world's leading brands.
2. We will set up an individual repayment schedule for you that takes into account your requirements.
3. You can choose a fixed or variable interest rate and financing in either Czech crowns or euros.
4. We will arrange attractive insurance conditions for you and incorporate them into the instalments.
5. We can draw on subsidies from local and European financial institutions to finance your technology.
