Equipment Finance

## Eva Zvoníčková Jiráňková

Sales Director

“Keeping up with the latest trends in information technology is a prerequisite for the success of any company in the 21st century. We are proud to partner with our clients as they invest in ICT systems. We arrange financing and help to find ideal solutions for the procurement and replacement of various high-tech facilities.”

---

Technology is forging ahead at a dizzying pace. Keep up with it. We have unique knowledge in high-tech financing, boast international experience, and work closely with a wide range of vendors of the most advanced technologies.

The financing of high-tech (hardware, software, etc.) represents only a fragment of the total non-banking financing market in the Czech Republic and Slovakia, yet as much as 30-40% in Europe. Companies around the world view information technologies as “consumables” essential for their efficient operation, and the way they choose to purchase IT reflects this. Rather than lock up your capital in technology acquisitions, leverage our financing instead.

## Items covered by financing

### High-tech

- Software (business licences encompassing the receipt of purchase orders, accounting and inventory records)
- Hardware (computers, laptops, servers, active network elements, peripherals, telecommunication equipment, etc.)
- Office equipment (single or multifunctional copiers)

### Medical technology

- Computed tomography, linear accelerators, magnetic resonance imaging, X-ray machinery.
- Ultrasound devices, lasers, optical instruments, dental surgery equipment.
- We work with state hospitals, specialised laboratories, private health centres and general practitioners.

## 4 reasons to rely on us

1. We will tailor financing to your specific requirements.
2. We will help you to optimise your technology acquisitions, including services, life-cycle management, and consideration for residual values when you retire your technology. In this way, you can constantly use new devices or optimally aged equipment at no extra cost.
3. We take into account income fluctuations, including seasonal payments or pay-per-use instalments in cooperation with vendors.
4. We facilitate lease relationships where we provide background refinancing and act as a bridge between the vendor and the end user (“fronting”).
